A paper which has been subjected to a conditioning process cycle will, after a sufficient number of cycles, attain a constant reaction, but will also show in drying a greater shrinkage and on becoming humid a smaller expansion than in the unconditioned state. Conditioned paper will remain flatter than unconditioned only as long as the climatic conditions to which, through conditioning its moisture content was adjusted, do not change. Measurements taken on an atomising humidification machine showed that the principle of electro-

Trans. of das Papier (West Germany) 1960, v. 14, no. 10a, p. 610-624.

DESCRIPTORS: *Paper, Quality control, Physical properties, Tests.

An apparatus has been designed which yields curves during paper tests recording the changes arising from the moisture content during a change of climatic conditions and the changes of dimensions of the papers as a function of time. The results of ample investigations show how different production conditions influence the relation between climatic conditions and dimension changes and affect the speed of these reactions. (Author

DESCRIPTORS: *Water supplies, *Wastes (industrial), *Purification, Paper industry, Sedimentation, Separation.

Investigations on 18 clarifying installations employed by the Paper and Board industry indicated that considerable differences existed in the layout of the installations and the circulatory systems inside the overall production water system. So far as fibre recovery is concerned, good clarifying effects are almost always obtained, although with chemical/mechanical clarification there is (Engineering--Chemical, TT, v. 11, no. 3) (over)

DESCRIPTORS: *Paper, Driers (Apparatus), Processing, Automation.

A brief outline is first given of present knowledge of the causes for the tendency to curl and for the curling of papers. New studies have dealt with an answer to the problem of why paper curls which has dried unevenly rapidly on both sides, and why such curvature always occurs in concave fashion towards the side which dried [illegible] of the relationships be-
